SCRL Emergency Plan
Information for All Households
2017

Before disaster strikes:

1. Prepare an emergency kit. This should include at least a 3-day supply of water, food, medicine, and other necessities. For a checklist, see www.redcross.org/prepare/location/home-family/get-kit.

2. Make an emergency plan. With all members of your household, discuss how to respond to emergencies that could happen where you live, learn, work, and play. Identify an out-of-area contact: someone who lives outside the area and could be contacted in case of emergency. Consider neighbors who may need special assistance. Guidelines for emergency plans are available at www.redcross.org/prepare/location/home-family/plan.

3. Make sure your house number is visible from the street.

4. Know the location of the Emergency Assembly Point (EAP) in your area. See the map entitled “Emergency Assembly Points, Numbered 1–17.”

When disaster strikes:

1. Make sure all people in your household are safe, and check your house for leaking gas, sparking electrical wires, and broken water pipes. Turn off these utilities only if there is clear evidence of danger.

2. If you need immediate help and can’t go to the EAP, display a “HELP” sign in your window or on your front door, otherwise display an “OK” sign.

3. Go to the EAP if your house isn’t safe, or someone in your household needs help that you can’t provide, or you’re OK and willing to help your neighbors.

4. Stay off the phone except for one call to your out-of-area contact person, and tune into Stanford radio station KZSU 90.1 FM.
